PROJECTS

PowerLook Website Clone:

[LINK](#)

Technologies Used: HTML , CSS, BOOTSTRAP

Responsibilities:

- Designed and implemented website layout using HTML5, ensuring semantic and accessible markup. Styled the website with CSS3 and Bootstrap for rapid development and consistent design.
- Optimized website performance, ensured cross-browser compatibility, and conducted testing and debugging to maintain smooth functionality

Attendance Via Location:-

[LINK](#)

Technologies Used :- HTML, CSS, Bootstrap, jQuery, PHP, MySQL

Responsibilities:

- Core Functionality: Developed a system to capture attendance by verifying user location within an admin-specified area.
- Location Verification: Proposed features to ensure users are within a designated zone before allowing attendance submission.
- Selfie Capture: Generated a selfie capture functionality during attendance checks, resulting in a 25% decrease in verification disputes and enhancing overall user trust in the attendance management process.
